

VIQ

Record/AB v2

Total audio management in a single, compact solution

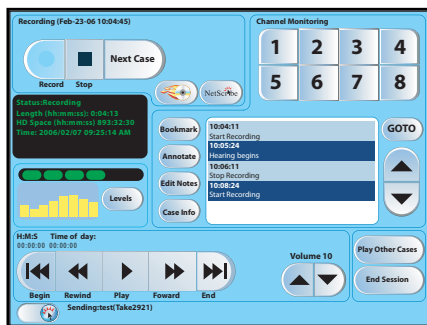

Recording Screen

Record/AB is an innovative, 8-channel recording console that lets you record, playback, and store digital audio. With simple tape recorder style controls and an easy to use touchscreen, Record/AB puts digital audio recording at your fingertips. Record/AB comes with over 10,000 channel hours of internal storage capacity and a built-in CD/DVD burner for easy external storage and backup. A complete standalone system, Record/AB is a fast, easy and cost-effective way to make the move to a digital recording system.

New Features!

Recording Screen

Virtual Keyboard

RecordIAB puts digital recording, playback, annotation, and management at your fingertips. With easy to use, tape recorder-style controls, RecordIAB is ideally suited for entry-level users or users replacing analog tape systems.

Digital Recording

- High quality digital sound
- Stores audio electronically so no worries about tapes being lost or damaged
- Make annotations while recording
- Store up to 10,000 channel hours of recording on internal hard drive

Audio Playback

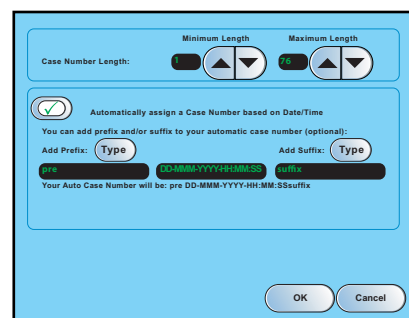

- Playback and review audio, even while recording
- Playback audio for the entire room or for your headphones only
- Play audio from a previous case while recording another

Graphics and Layout

- Simple tape recorder-style controls for ease of use
- Enhanced graphic user interface
- Visible icons ensure you always know when recording is taking place
- Supports external keyboard, mouse and monitor

Case Number Options

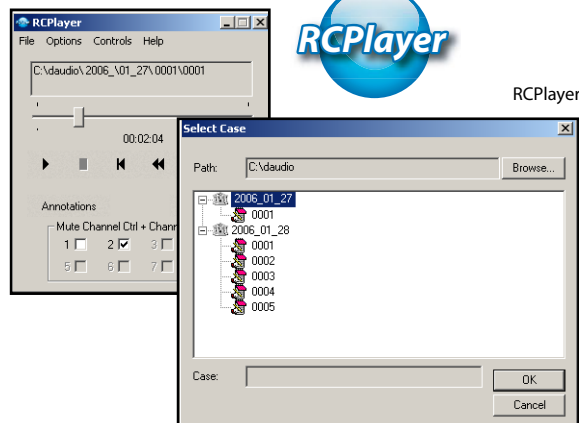

- Case numbers between 1 and 255 characters
- Can set minimum and maximum values
- Optional automatic case number with configurable prefix/suffix

Auto case number

CD/DVD Burning & Transcription

- Produce CD or DVD for storage, backup, or remote use
- Archived disks include a copy of RCPlayer playback and transcription utility
- Works with standard CD-R or DVD-R disks
- Archive audio while recording
- Assign a unique media label to each disk
- Supports multiple cases per disk and cases can span disks
- RCPlayer supports USB footpedals and multi-channel playback control

Audio Controls

- Record between 1 and 8 distinct channels
- Can “mix and match” microphone configuration so that multiple microphones are mixed into a single audio channel
- Monitor each channel individually
- On-screen VU meters display current decibel level
- Switch between Mic and Line adjustment
- Adjust analog or digital gain for precise audio tuning

Case Search

- Advanced search using case number or date
- Easily locate unarchived cases
- Search deleted case logs for case records

Preferences

- Button configuration lets you hide functions you don't use
- Keyboard hotkeys for faster workflow
- Administrative exit to Windows option

Administrator Web Pages

- Configure the RecordIAB from a remote networked computer
- Audit history details RecordIAB activity
- Configure required case information
- Manage administrative users

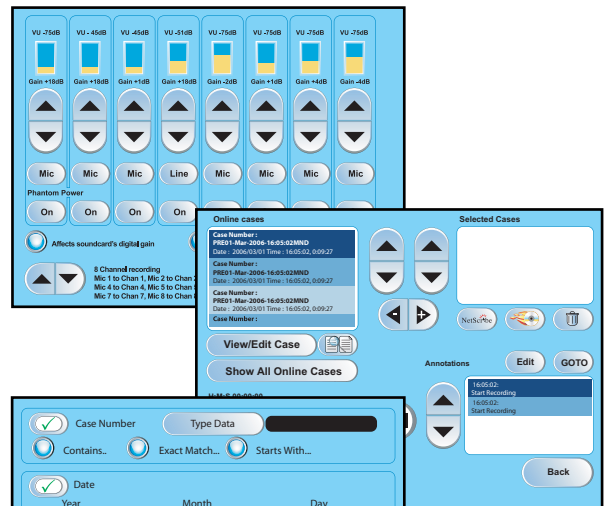

NetScribe Ready

Enabled NetScribe option

- Compatible with VIQ's NetScribe transcription and workflow solution
- Send audio for transcription right from the RecordIAB unit
- Transcripts delivered electronically via RecordIAB Administrator web pages
- Configuration and monitoring via RecordIAB Administrator web pages
